

Student Laptop Agreement

(for joining a personally-owned device to the network)

Your student has been given permission to join their personally-owned device to the district network for the period of time stated below. They are responsible for appropriate network behavior as specified in the *district Acceptable Use Agreement*. We provide this service to help meet the educational needs of your child.

The District is not responsible for maintenance of personally-owned equipment, nor is the District liable if this equipment is lost, stolen, or damaged.

We require that the student or his/her parents meet certain maintenance and safety requirements in order to help ensure the safety and integrity of our network. These requirements are outlined below.

- Monitor the device to ensure that all software is legally installed.
- Ensure that appropriate software and operating system updates are installed when prompted to do so (at least monthly).
- Ensure that anti-virus software is installed correctly and updated regularly (i.e. once a week) where needed.
- Ensure that reasonable measures are taken to mitigate the spread of spyware and other types of malware.

Please sign below to indicate your agreement with the above.

Student's Name _____

Parent's Name _____

Parent Signature _____
