

Spotlight Items

Musini

Magically convert your child's energy into music! A motion sensor allows your child to play music with any motion.

It can be programmed to play a wide variety of music with the buttons on the top. Has volume control. Can be used for simple cause and effect reinforcement, direct selection, sequencing, following directions, color identification, or even fun in a group.

Animal Rock

Multisensory toy to improve fine motor and cognitive interaction. Buttons activate animal sounds and sounds of the jungle as well as lights and vibration. Great for simple cause and effect, encouraging reach and weight bearing in a number of positions or building communication skills.
